

***The following interview was conducted in a similar manner as was conducted in the best selling book series "Conversations With God" by Neale Donald Walsch. Although I do not possess the same intimate knowledge of spirituality as Mr. Walsch, my 10 year journey following precious metal markets has connected me to some very powerful spiritual monetary beings...and they have something to say. So let's begin.**

Me: Is anybody there?

God: Yes, I am here.

Me: Hi God! How do I do this? I read the books but I don't want to sound like I'm anyone special because I can talk to God.

God: But you are special...we all are. You just ask your questions and the answers will be provided by your thoughts. Don't stop to edit your thoughts. Just trust your answers and we will both provide the answers we need.

Me: Ok. I'll start with an easy one. Are gold and silver markets manipulated?

God: Of course they are... Duh!

Me: Wait, is God supposed to say duh?

God: Don't waste my time. What's your next question?

Me: Who is doing it and why?

God: There are many groups of people who manipulate all markets and they all have different reasons. Some are driven by money, some by power but the largest group is driven by fear.

Me: Fear?! These people control the world...what could they be afraid of.

God: They are afraid of you and people like you. They are afraid they will be found out and the world as they know it will come crashing down. They are afraid that the people of the world will begin to understand the fiat money fraud and will be angry.

Me: Well don't the ones with the money, the rich and powerful, make the rules? Why would this ever end?

God: The "rich and the powerful" are only rich with their monetary illusion. Without fiat currency they are not rich and their power crumbles. The rules will be changed very soon.

Me: How soon? I thought this would be over years ago. What will stop them from running this scam FOREVER?

God: You are stopping them...and people like you. There is also a group of people who have been working on taking these people down much longer than most know. They have been hoarding physical gold for many years and are preparing to go on a gold standard. They have been VERY secretive but they are ready to end the fiat money system.

Me: When?

God: They will pull the plug very soon...

Me: Who are these people?

God: They are mostly very patriotic Americans but also others around the world

including a very powerful group within China.

Me: Wait. Won't China be hurt by the destruction of the US Dollar since they are the largest holder?

God: No. It was part of the plan. China never wanted US Dollars. They wanted to build their manufacturing infrastructure. Multi-national companies have spent Trillions building their factories in China. The destruction of the fiat currencies will leave China very well off.

Me: Doesn't China need the US to sell all their goods at stores like WalMart?

God: No. China has over a billion people. There is no shortage of domestic customers only a shortage of those fiat pieces of paper.

Me: What about Globalization?

God: Globalization will end with the fiat currencies. When the fiat money crashes every country will fend for themselves and take care of their own needs the best they can.

Me: What will happen to the United States?

God: They will benefit the most since they have the highest debt and the most natural resources.

Me: Wait what will happen to debt? People are drowning in debt in the US.

God: All debt will disappear without the fiat currency and a new monetary system will be put in place in each country. Fiat money will end.

Me: Since we NEED some kind of money, how will the new money get distributed?

God: There are many equitable ways but the best is through the Social Security system. In this allocation system those who are the oldest and have made the most money over the years will be allocated money first and in equitable amounts. This will also SOLVE the Social Security "problem" that has hung over the US Dollar for decades. This was Alan Greenspan's idea back in the early 1970's when he implemented the first computer market rigging programs.

Me: So what will happen when the fiat system crashes? Will it be good, bad or the same?

God: Like any change there will be some pain BUT most of that pain will be felt by the small number of very wealthy. 99% of the population of the world is already in pain and will FINALLY get to share in the wealth of their nations. They will feel rich because the wealth will be reallocated.

Me: Isn't that kinda socialistic for the American system of government?

God: It may feel like that to the rich but this would be a one time occurrence. A "restart" of the American Way that was stolen by the fiat money crowd. Just imagine no more debt and a more equitable distribution of the wealth of the USA. Almost everyone would feel like millionaires overnight!

Me: Sounds great! Will the currency be backed by gold and silver again?

God: The founding fathers never meant for the money to be "backed" by gold and silver. The money of the United States of America IS gold and silver. Period. If people chose to use paper script in lieu of carrying around metal that will be their choice. There is also no problem with many forms of money as long as they are transparent so there may spring up other methods of payment such as paper, electronic credits and barter. Individuals will be free to choose their own forms of money. Ultimately, gold and silver will prove to be the most sound of all the monetary choices available.

Me: What if the current "Powers-That-Be" don't allow any of this to transpire?

God: They have no choice. The power lies with the people now and although the bad guys continue to fight their defeat is at hand. The intent is to have a peaceful transition but there are some within the manipulation crowd that are resisting to the very end.

Me: Where does the power to overthrow the bad guys come from?

God: The power has always been with the people but the tools being implemented are within the financial computer systems of the world. The end of the fiat money system has been programmed in and is only awaiting the execute command. The world will change overnight.

Me: I've been studying and preparing for this for years yet I still feel very afraid of this kind

of drastic change. Is there anything I can do to prepare?

God: Yes. Be prepared for a few months of chaos. Keep enough food and water on hand in case the transition takes longer than we hope. But most of all have faith that this is a VERY GOOD thing for humanity.

Me: Is there anything else I should do?

God: Yes. Get some sleep and stop thinking about all this stuff. Spend time with your friends and family.

Me: Ok, can I come back with more questions? I have a lot of friends and colleagues who will wonder why I didn't ask more.

God: Yes, I am always here with you.

Me: Thanks. I feel better.

God: Me too

May the Road you choose be the Right Road
