

## HEALTH

### • Gefersa Mental Rehabilitation Centre (Addis Ababa)

The Company has financed, built and donated the first stage of Gefersa Mental Rehabilitation Centre, located over an area of 12 hectares near Addis Ababa. The first stage completed in the year 2009, includes new dormitories for the patients, houses for doctors and visiting guests, a large clinic with dispensary, a canteen with the relevant kitchen, a barn for the occupational therapy and a sport field. The area has been fenced, landscaped, provided with internal roads, lighting and other utilities including a biogas plant. At present it may comfortably accommodate 200 inmates and take care for more patients on day-hospital (OPD) basis.

This facility will alleviate the lack of modern institutions in Addis Ababa for the mentally ill. The centre cares for mental illness and promotes rehabilitation, re-integration, contact with family and social acceptance.

(First stage: estimated value 30 million ETB).
