

The Ultimate Ham Mobile!

If you live in the UK, here's some great news!

A communications company is disposing of three [Nissan Patrols](#) outfitted with 10-meter pneumatic masts and backseat radio operating positions.

In addition to the mast and compressor, each of the three SUVs are fitted with storage and bench units in the back — but unfortunately, the radio gear shown in the photos is not included.

No word on pricing or terms. Seriously interested buyers are asked to contact them by phone (020 7981 3904) for more information.
