

# Important items for training in Aikido

## The use of the Tegatana in Aikido

We are using tegatana to neutralize a grip attack

- Using the omote and ura part of the hand

We are using a lot of techniques where we grip the opponent.

- Where to grip ? Wrist, arm, elbow, dogi,.....

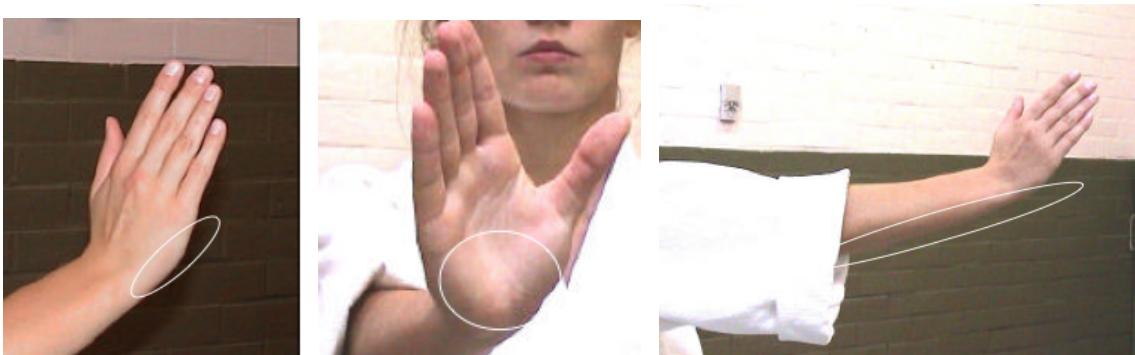

We are using tegatana to parry an incoming attack.

- How to parry ? Attack : shomen ate, shomen uchi, yokomen uchi, shomen tsuki, .....

According to Kenji Tomiki, we cannot limit the use of Tegatana alone to the handblade. Other parts of the hand and arm can be used as “Tegatana”

We can see here clearly the influence of swordsmanship in our Aikido.

These are examples of Tegatana

## Tegatana training methods

### Neutralizing grip to wrist

4-hon kuzushi

- ura dori ude hineri (ai gamae )

- omote dori ude hineri ( gyaku gamae)

- omote dori ude gaeshi (ai gamae )

- ura dori ude gaeshi (gyaku gamae )
